

Author index to Volume 36, 1999

Key: (RA) = Review Article; (OA) = Original Article; (SR) = Short Report; (CR) = Case Report; (PV) = Personal View; (L) = Letter

- Akbay A, Demirtas S, Yavuz Y: Increased serum thymidine kinase following chemotherapy 771 (SR)
- Al-Jubouri MA: Review of investigation and management of severe hyponatraemia in a hospital population 531 (L)
- Al-Jubouri MA: Secondary adrenal failure in a young woman presenting as hypoglycaemic coma 114 (L)
- Alhomida AS: Influence of acetate and bicarbonate dialysate on blood short- and long-chain acyl carnitine in adult pyelonephritis patients 48 (OA); 786 (L)
- Allen JC *see* Moat SJ
- Allen KR, Degg TJ, Rushworth PA, Smith M, Henderson MJ: Measurement of phenylalanine and tyrosine in plasma by high-performance liquid chromatography using the inherent fluorescence of aromatic amino acids 207 (OA)
- Allen KR *see also* Stirik H
- Alvarez D *see* San José ME
- Anderson SK *see* Southgate HJ
- André E *see* Guibourdenche J
- Aoki T *see* Ihara H
- Aoki Y *see* Numakami K
- Ashihara Y *see* Isomura M
- Aspostolakiou F *see* Morgan LM
- Astley P *see* Gunneberg A
- Aylwin SJB *see* De Jong I
- Azzazy HME, Duh S-H, Fitzgerald RL, McLawhorn RW, Rosenthal M, Christenson RH: Multisite study of a second generation whole blood rapid assay for cardiac troponin T 438 (OA)
- Baadenhuijsen H *see* de Keijzer MH
- Babu SVS *see* Christopher R
- Baines M, Gosney JR, Hine TJ, Roberts NB: Creatine kinase-BB isoenzyme in chest pain: an indicator that change in creatine kinase is not always due to an infarct? 526 (CR)
- Baker JR *see* Johnson RN
- Bakker AJ, Jellema B: Prevention of protein adsorption: effect on patient results for microalbuminuria 163 (OA)
- Balagué C *see* Biondi C
- Baldwin DR, Marshall WJ: Heavy metal poisoning and its laboratory investigation 267 (RA)
- Ballantyne FC, Neilly JB: Caution is needed in point-of-care monitoring of oxygen therapy in chronic obstructive pulmonary disease 109 (CR)
- Ballantyne FC *see also* Herdman JJ
- Barker M *see* Hickman M
- Barnes SC, Wicking JM, Johnston JD: Graves' disease presenting with cholestatic jaundice 677 (CR)
- Barratt LJ *see* Shephard MDS
- Barrio J *see* Martínez-Brú C
- Bartels PCM *see* Pronk-Admiraal CJ
- Beastall GH *see* McConway MG
- Beghin L, Capps N, Duhal N, Davies J, Staels B, Luc G: Metabolism of apolipoproteins AI and AII in a patient with paradoxical reduction in high-density lipoprotein due to ciprofibrate 523 (CR)
- Beilby JP *see* Rossi E
- Bekeris LG *see* Young DS
- Belmonte MA *see* Yago M
- Beltran J *see* Yago M
- Benzie IFF, Chung W-Y: Total antioxidant power of plasma: male-female differences and effect of anticoagulant used 104 (SR)
- Beránek M *see* Van Nuwenborg JE
- Billington D *see* Lowe GM
- Bilton RF *see* Lowe GM
- Bingham D, Kendall J, Clancy M: The portable laboratory: an evaluation of the accuracy and reproducibility of i-STAT 66 (OA)
- Biondi C, Cotorruello C, Balagué C, Toresani I, Racca L, Di Mónaco R, Fernández L, Racca A: Association of the 'secretor state' with the presence and recurrence of urinary infections in pregnant women 391 (SR)
- Blok BH *see* McNeil AR
- Bolzonella C, Gusella M, Bononi A, Loregian A, Crepaldi G, Toso S, Palù G, Ferrazzi E: Quantitative analysis of ribonucleoside triphosphates in human lymphoid cells by micellar electrokinetic capillary chromatography 636 (OA)
- Bone JM *see* Roberts NB

Subject index to Volume 36, 1999

Key: (RA) = Review Article; (OA) = Original Article; (SR) = Short Report; (CR) = Case Report; (PV) = Personal View; (L) = Letter

- Abbott FPIA assay.** Stabilizing blood with 3-deaza-adenosine interferes in the Abbott FPIA assay for plasma homocyst(e)ine **669** (SR)
- Abbott IMx homocysteine assay.** Abbott IMx homocysteine assay: significant interference by 3-deaza-adenosine **533** (L)
- Abetalipoproteinaemia.** Blood dolichols in a patient with abetalipoproteinaemia **176** (OA)
- Acetate.** Influence of acetate and bicarbonate dialysate on blood short- and long-chain acyl carnitine in adult pyelonephritis patients **48** (OA), **786** (L)
- Acid/base balance.** Renal tubular acidosis **408** (RA)
- Acidaemias.** A personal computer-based system for interpretation of gas chromatography mass spectrometry data in the diagnosis of organic acidaemias **671** (SR)
- Acute heart failure.** Monitoring of cardiac troponin I in patients with acute heart failure **433** (OA)
- Acute-phase protein.** A new method for haptoglobin phenotyping **609** (OA)
- Acute phase reactants.** No relationship between serum lipoprotein(a) and albumin concentrations in patients with acute phase response **617** (OA)
- Acyl carnitine.** Influence of acetate and bicarbonate dialysate on blood short- and long-chain acyl carnitine in adult pyelonephritis patients **48** (OA), **786** (L)
- Addison's disease.** Assessment of corticosteroid replacement therapy in adults with adrenal insufficiency **151** (RA)
- Adenosine deaminase.** Beta-2-microglobulin and immunoglobulins are more useful markers of disease progression in HIV than neopterin and adenosine deaminase **601** (OA)
- Adrenal failure.** Secondary adrenal failure in a young woman presenting as hypoglycaemic coma **114** (L)
- Adrenal insufficiency.** Assessment of corticosteroid replacement therapy in adults with adrenal insufficiency **151** (RA)
- Adrenomedullin.** Increased plasma proadrenomedullin N-terminal 20 peptide in patients with essential hypertension **622** (OA)
- Adriamycin.** Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin **216** (OA)
- Affinity chromatography.** Detection of lactate dehydrogenase isoenzyme-M in body fluids containing albumin **250** (SR)
- Age-related changes.** Age-related changes in the concentration of pyridinoline cross-links in human skin **666** (SR)
- Albumin**
Detection of lactate dehydrogenase isoenzyme-M in body fluids containing albumin **250** (SR)
No relationship between serum lipoprotein(a) and albumin concentrations in patients with acute phase response **617** (OA)
Prevention of protein adsorption: effect on patient results for microalbuminuria **163** (OA)
- Albumin-free bilirubin.** Threshold concentration of unbound bilirubin to induce neurological deficits in a patient with type I Crigler-Najjar syndrome **347** (OA)
- Albumin variants.** Unusually slow-migrating albumin variants: rapid confirmation using immunofixation **514** (SR)
- Alcaptonuria.** 'Pseudohypouricosuria' in alcaptonuria: homogentisic acid interference in the measurement of urinary uric acid with the uricase-peroxidase reaction **501** (OA)
- Alcoholic ketoacidosis.** Alcoholic ketoacidosis as the cause of repeated episodes of severe metabolic acidosis **783** (CR)
- Alendronate.** Clinical usefulness of biochemical resorption markers in osteoporosis **483** (OA)
- Alkaline phosphatase isoenzyme.** An unusual alkaline phosphatase isoenzyme associated with gastric carcinoma **743** (OA)
- Allergy.** Eosinophil cationic protein in serum from nonatopic and asymptomatic atopic individuals after standardized blood clotting at 37 °C **353** (OA)
- Alpha-1-antitrypsin.** No relationship between serum lipoprotein(a) and albumin concentrations in patients with acute phase response **617** (OA)
- Alpha-fetoprotein**
Accuracy of Down's syndrome risks produced in a prenatal screening program **101** (SR)
Correlation of marker values in Down's syndrome screening: the effect of dating error **460** (OA)
Evaluation of different weight correction methods for antenatal serum screening using data from two multi-centre programmes **359** (OA)
- Alpha-tocopherol.** Serum retinol and alpha-tocopherol levels in healthy Asian subjects and patients **244** (SR)
- Amino acids**
Measurement of phenylalanine and tyrosine in plasma by high-performance liquid chromatography using the inherent fluorescence of aromatic amino acids **207** (OA)
Measurement of urinary amino acids using high-performance liquid chromatography equipped with a strong cation exchange resin pre-column **202** (OA)

- Ammonium chloride load test.** Renal tubular acidosis 408 (RA)
- Amphetamines.** Evaluation of detection techniques and laboratory proficiency in testing for drugs of abuse in urine: an external quality assessment scheme using clinically realistic urine samples 592 (OA)
- Analysis of covariance.** Differences in rates of glycation (glycation index) may significantly affect individual HbA_{1c} results in type 1 diabetes 451 (OA)
- Angiotensin-converting enzyme.** Variations in serum angiotensin-converting enzyme activity following lung resection: a controlled study in a clinical setting 212 (OA)
- 1,5-Anhydro-D-glucitol.** Serum concentration and renal handling of 1,5-anhydro-D-glucitol in patients with chronic renal failure 749 (OA)
- Antenatal serum screening.** Evaluation of different weight correction methods for antenatal serum screening using data from two multi-centre programmes 359 (OA)
- Anti-SSA and anti-SSB antibodies.** Detecting anti-SSA and anti-SSB antibodies in routine analysis: a comparison between double immunodiffusion and immunoblotting 365 (OA)
- Anticoagulants**
Quantitative determination of methaemoglobin and carboxyhaemoglobin by co-oximetry, and effect of anticoagulants 774 (SR)
Total antioxidant power of plasma: male-female differences and effect of anticoagulant used 104 (SR)
- Antiepileptic drugs.** New antiepileptic drugs 10 (PV), 785 (L)
- Antimony.** Heavy metal poisoning and its laboratory investigation 267 (RA)
- Antioxidant enzymes.** Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin 216 (OA)
- Antioxidants**
Carotenoid composition and antioxidant potential in subfractions of human low-density lipoprotein 323 (OA)
Plasma antioxidants following cardiac surgery 683 (L)
Serum and tissue antioxidant capacity in cervical intraepithelial neoplasia investigated using an enhanced chemiluminescent reaction 86 (OA)
Total antioxidant power of plasma: male-female differences and effect of anticoagulant used 104 (SR)
- Apolipoproteins.** Metabolism of apolipoproteins A1 and AII in a patient with paradoxical reduction in high-density lipoprotein due to ciprofibrate 523 (CR)
- Aquaporin 2.** Nephrogenic diabetes insipidus due to a new mutation of the arginine vasopressin V2 receptor gene in a girl presenting with non-accidental injury 779 (CR)
- Arginine vasopressin V2 receptor gene.** Nephrogenic diabetes insipidus due to a new mutation of the arginine vasopressin V2 receptor gene in a girl presenting with non-accidental injury 779 (CR)
- Aromatic amino acids.** Measurement of phenylalanine and tyrosine in plasma by high-performance liquid chromatography using the inherent fluorescence of aromatic amino acids 207 (OA)
- Arsenic.** Heavy metal poisoning and its laboratory investigation 267 (RA)
- Asian subjects.** Serum retinol and alpha-tocopherol levels in healthy Asian subjects and patients 244 (SR)
- Aspartate aminotransferase.** Influence of mammary artery as a bypass vessel on the results of seven biochemical assays after coronary artery bypass surgery 180 (OA)
- Assessment.** Assessing the quality of comments on reports: a retrospective study 316 (OA)
- Atherogenic lipid profile.** Effect of atorvastatin on low-density lipoprotein subfraction profile 240 (SR)
- Atopy.** Eosinophil cationic protein in serum from nonatopic and asymptomatic atopic individuals after standardized blood clotting at 37 °C 353 (OA)
- Atorvastatin**
Atorvastatin and low-density lipoprotein subfractions profile in mixed hyperlipidaemia: a contributory effect of reduced hepatic lipase activity? 788 (L)
Effect of atorvastatin on low-density lipoprotein subfraction profile 240 (SR)
- Autoantibodies.** Autoantibodies and specific serum proteins in the diagnosis of rheumatological disorders 565 (RA)
- Autoimmune disease.** Different strategies in the laboratory diagnosis of autoimmune disease: immunofluorescence, enzyme-linked immunosorbent assay or both? 189 (OA)
- Automated chemiluminescence system.** Measurement of S-100 protein using the automated chemiluminescence system Lia-mat 300 777 (SR)
- B-chronic lymphocytic leukaemia.** Quantitative analysis of ribonucleoside triphosphates in human lymphoid cells by micellar electrokinetic capillary chromatography 636 (OA)
- Bayer DCA 2000.** Is the Bayer DCA 2000 acceptable as a screening instrument for the early detection of renal disease? 393 (SR)
- Beta-cryptoxanthin.** Carotenoid composition and antioxidant potential in subfractions of human low-density lipoprotein 323 (OA)
- Beta-2-microglobulin.** Beta-2-microglobulin and immunoglobulins are more useful markers of disease progression in HIV than neopterin and adenosine deaminase 601 (OA)
- Bicarbonate dialysate.** Influence of acetate and bicarbonate dialysate on blood short- and long-chain acyl carnitine in adult pyelonephritis patients 48 (OA); 786 (L)
- Bilirubin.** Threshold concentration of unbound bilirubin to induce neurological deficits in a patient with type I Crigler-Najjar syndrome 347 (OA)
- Bisalbuminaemia.** Unusually slow-migrating albumin variants: rapid confirmation using immunofixation 514 (SR)
- Bismuth.** Heavy metal poisoning and its laboratory investigation 267 (RA)

- Blood glucose self-monitoring.** Analytical error of home glucose monitors: a comparison of 18 systems **72** (OA)
- Bloodspot testosterone assay.** Bloodspot testosterone assay suitable for study of neonates and monitoring of children with congenital adrenal hyperplasia **477** (OA)
- Book reviews**

- BR 27.29.** CA 15-3 and related mucins as circulating markers in breast cancer **579** (RA)
- Breast cancer.** CA 15-3 and related mucins as circulating markers in breast cancer **579** (RA)
- Breslow thickness.** Measurement of S-100 protein using the automated chemiluminescence system Lia-mat 300 **777** (SR)
- C-peptide.** Assays for insulin, proinsulin(s) and C-peptide **541** (RA)
- C-reactive protein.** Knowing the serum C-reactive protein concentration is not helpful when interpreting thyroid function tests **766** (SR)
- CA 15-3.** CA 15-3 and related mucins as circulating markers in breast cancer **579** (RA)
- Cadmium.** Heavy metal poisoning and its laboratory investigation **267** (RA)
- Calcitonin.** Development of a highly sensitive enzyme immunoassay for human calcitonin using solid phase coupled with multiple antibodies **629** (OA)
- Calcium.** A case of factitious normocalcaemia **530** (L)
- Calibrators**
- Evaluation of five different high-density lipoprotein cholesterol assays: the most precise are not the most accurate **168** (OA)
- Hepatitis C virus in calibrators and quality assurance samples made from pooled human serum, **785** (L)
- Capillary electrophoresis.** Capillary electrophoresis in clinical chemistry **133** (PV)
- Carbohydrate-deficient glycoprotein syndromes.** Carbohydrate-deficient glycoprotein syndromes: inborn errors of protein glycosylation **20** (RA)
- Carbon tetrachloride.** Alleviation of carbon tetrachloride-induced chronic liver injury and related dysfunction by L-tryptophan in rats **504** (OA)
- Carboxyhaemoglobin.** Quantitative determination of methaemoglobin and carboxyhaemoglobin by coximetry, and effect of anticoagulants **774** (SR)
- Carcinoma.** Review of investigation and management of severe hyponatraemia in a hospital population **158** (OA); **531** (L)
- Cardiac surgery.** Plasma antioxidants following cardiac surgery **683** (L)
- Cardiac troponin I.** Monitoring of cardiac troponin I in patients with acute heart failure **433** (OA)
- Cardiac troponin T**
- Comparison of two methods for measurement of cardiac troponin T in patients with acute myocardial infarction **242** (SR)
- Influence of mammary artery as a bypass vessel on the results of seven biochemical assays after coronary artery bypass surgery **180** (OA)
- Multisite study of a second generation whole blood rapid assay for cardiac troponin T **438** (OA)
- Cardiovascular risk factor.** Microalbuminuria: yet another cardiovascular risk factor? **700** (PV)
- Carotenoid composition.** Carotenoid composition and antioxidant potential in subfractions of human low-density lipoprotein **323** (OA)
- Catecholamine.** Urinary catecholamine excretion in relation to renal function **587** (OA)
- CD3+, CD14+ and CD45+ antigens.** Three-colour, one-tube flow cytometric method for enumeration of CD4+ and CD8+ lymphocytes **196** (OA)
- Cerebral infarction.** Methionine loading in a Down's syndrome patient with cerebral infarction **252** (CR)
- Cervical cancer.** Serum and tissue antioxidant capacity in cervical intraepithelial neoplasia investigated using an enhanced chemiluminescent reaction **86** (OA)
- Cervico-vaginal secretions.** Rapid detection of insulin-like growth factor-binding protein-1 and foetal fibronectin in cervico-vaginal secretions to diagnose premature membrane rupture **388** (SR)
- Chemotherapy.** Increased serum thymidine kinase following chemotherapy **771** (SR)
- Chest pain.** Creatine kinase-BB isoenzyme in chest pain: an indicator that change in creatine kinase is not always due to an infarct? **526** (CR)
- Cholestatic jaundice.** Graves' disease presenting with cholestatic jaundice **677** (CR)
- Chromogranin A.** Serum chromogranin A and its relationship to endogenous markers of glomerular filtration rate **247** (SR)

- Chronic obstructive pulmonary disease.** Caution is needed in point-of-care monitoring of oxygen therapy in chronic obstructive pulmonary disease 109 (CR)
- Chronic renal failure**
Assessment of the feasibility of conducting population prevalence studies of chronic renal failure according to ethnic group: a survey of clinical biochemistry laboratories in Greater London and south east England 94 (OA)
Behaviour of urinary dipeptidase in patients with chronic renal failure 221 (OA)
Serum concentration and renal handling of 1,5-anhydro-D-glucitol in patients with chronic renal failure 749 (OA)
- Ciprofibrate.** Metabolism of apolipoproteins AI and AII in a patient with paradoxical reduction in high-density lipoprotein due to ciprofibrate 523 (CR)
- Cisplatin.** Measurement of platinum in saliva of patients treated with cisplatin 655 (OA)
- Citrate.** A case of factitious normocalcaemia 530 (L)
- Cleavage fragment length polymorphism.** Detection of p53 gene mutations in its full translational sequence by cleavage fragment length polymorphism analysis 511 (SR)
- Clinical biochemistry laboratories.** A survey of endocrine function testing by clinical biochemistry laboratories in the UK 112 (L)
- Clinical biochemistry reports.** Experience with assessing the quality of comments on clinical biochemistry reports 759 (OA)
- Clinical biochemists.** The clinical role of clinical biochemists 691 (PV)
- Co-fluorescence.** Development and evaluation of a direct immunofluorimetric assay for urinary growth hormone 649 (OA)
- Co-oximetry.** Quantitative determination of methaemoglobin and carboxyhaemoglobin by co-oximetry, and effect of anticoagulants 774 (SR)
- Comments**
Assessing the quality of comments on reports: a retrospective study 316 (OA)
Experience with assessing the quality of comments on clinical biochemistry reports 759 (OA)
- Competence.** The clinical role of clinical biochemists 691 (PV)
- Compound heterozygous hereditary coproporphria.** Compound heterozygous hereditary coproporphria with fluorescing teeth 680 (CR)
- Congenital adrenal hyperplasia.** Bloodspot testosterone assay suitable for study of neonates and monitoring of children with congenital adrenal hyperplasia 477 (OA)
- Connective tissue diseases.** Detecting anti-SSA and anti-SSB antibodies in routine analysis: a comparison between double immunodiffusion and immunoblotting 365 (OA)
- Conway diffusion dish.** A simple, rapid and sensitive semimicro method for the measurement of cyanide in blood 755 (OA)
- Coproporphria.** Compound heterozygous hereditary coproporphria with fluorescing teeth 680 (CR)
- Coronary artery bypass surgery.** Influence of mammary artery as a bypass vessel on the results of seven biochemical assays after coronary artery bypass surgery 180 (OA)
- Corticosteroid replacement therapy.** Assessment of corticosteroid replacement therapy in adults with adrenal insufficiency 151 (RA)
- Costs.** The inordinate complexity of delivering laboratory services in the USA 123 (PV)
- Cotinine assays.** Are cotinine assays of value in predicting adverse pregnancy outcome? 468 (OA), 789 (L)
- Creatine kinase-BB isoenzyme.** Creatine kinase-BB isoenzyme in chest pain: an indicator that change in creatine kinase is not always due to an infarct? 526 (CR)
- Creatine kinase MB mass.** Influence of mammary artery as a bypass vessel on the results of seven biochemical assays after coronary artery bypass surgery 180 (OA)
- Creatinine.** Serum chromogranin A and its relationship to endogenous markers of glomerular filtration rate 247 (SR)
- Crigler-Najjar syndrome.** Threshold concentration of unbound bilirubin to induce neurological deficits in a patient with type I Crigler-Najjar syndrome 347 (OA)
- Critically ill patient.** Does blood lactate measurement have a role in the management of the critically ill patient? 401 (PV)
- Cyanide.** A simple, rapid and sensitive semimicro method for the measurement of cyanide in blood 755 (OA)
- Cystatin C.** Serum chromogranin A and its relationship to endogenous markers of glomerular filtration rate 247 (SR)
- Cystic fibrosis.** Faecal elastase I: a marker of exocrine pancreatic insufficiency in cystic fibrosis 739 (OA)
- Cystoscopy.** Influence of investigative and operative procedures on serum prostate-specific antigen concentration 340 (OA)
- Cytochrome P450.** Cytochrome P450 enzyme system: genetic polymorphisms and impact on clinical pharmacology 722 (RA)
- Dating error.** Correlation of marker values in Down's syndrome screening: the effect of dating error 460 (OA)
- De-ammoniation.** Measurement of urinary amino acids using high-performance liquid chromatography equipped with a strong cation exchange resin precolumn 202 (OA)
- 3-Deazaadenosine**
Abbott IMx homocysteine assay: significant interference by 3-deazaadenosine 533 (L)
Stabilizing blood with 3-deazaadenosine interferes in the Abbott FPIA assay for plasma homocyst(e)ine 669 (SR)
- Deoxypyridinoline.** Clinical usefulness of biochemical resorption markers in osteoporosis 483 (OA)
- Diabetes insipidus.** Nephrogenic diabetes insipidus due to a new mutation of the arginine vasopressin V2 receptor gene in a girl presenting with non-accidental injury 779 (CR)

Diabetes mellitus

Assays for insulin, proinsulin(s) and C-peptide **541** (RA)

Behaviour of urinary dipeptidase in patients with chronic renal failure **221** (OA)

Differences in rates of glycation (glycation index) may significantly affect individual HbA_{1c} results in type 1 diabetes **451** (OA)

Establishing trimester- and ethnic-group-related reference ranges for fructosamine and HbA_{1c} in non-diabetic pregnant women **235** (SR)

Influence of the laboratory upon requests for oral glucose tolerance tests for the diagnosis of diabetes mellitus **260** (L)

Measurement of glycated haemoglobin by boronate-affinity high-pressure liquid chromatography **233** (SR)

Prevention of protein adsorption: effect on patient results for microalbuminuria **163** (OA)

Serum concentration and renal handling of 1,5-anhydro-D-glucitol in patients with chronic renal failure **749** (OA)

Dipeptidase. Behaviour of urinary dipeptidase in patients with chronic renal failure **221** (OA)

Direct immunofluorimetric assay. Development and evaluation of a direct immunofluorimetric assay for urinary growth hormone **649** (OA)

Diuretics. Review of investigation and management of severe hyponatraemia in a hospital population **158** (OA); **531** (L)

Diurnal variations. Diurnal variations in peripheral insulin resistance and plasma non-esterified fatty acid concentrations: a possible link? **447** (OA)

Dolichols. Blood dolichols in a patient with abetaloproteinaemia **176** (OA)

Double immunodiffusion. Detecting anti-SSA and anti-SSB antibodies in routine analysis: a comparison between double immunodiffusion and immunoblotting **365** (OA)

Down's syndrome

Accuracy of Down's syndrome risks produced in a prenatal screening program **101** (SR)

Correlation of marker values in Down's syndrome screening: the effect of dating error **460** (OA)

Evaluation of different weight correction methods for antenatal serum screening using data from two multi-centre programmes **359** (OA)

Methionine loading in a Down's syndrome patient with cerebral infarction **252** (CR)

Drug interactions. New antiepileptic drugs **10** (PV)

Drug metabolism. Cytochrome P450 enzyme system: genetic polymorphisms and impact on clinical pharmacology **722** (RA)

Drugs of abuse. Evaluation of detection techniques and laboratory proficiency in testing for drugs of abuse in urine: an external quality assessment scheme using clinically realistic urine samples **592** (OA)

Duty biochemist

Assessing the quality of comments on reports: a retrospective study **316** (OA)

Experience with assessing the quality of comments on clinical biochemistry reports **759** (OA)

Education. Experience with assessing the quality of comments on clinical biochemistry reports **759** (OA)

Elastase 1. Faecal elastase 1: a marker of exocrine pancreatic insufficiency in cystic fibrosis **739** (OA)

Electrochemiluminescence. Comparison of two methods for measurement of cardiac troponin T in patients with acute myocardial infarction **242** (SR)

Electrophoresis

Capillary electrophoresis in clinical chemistry **133** (PV)

Effect of atorvastatin on low-density lipoprotein subfraction profile **240** (SR)

Eluent. Measurement of urinary amino acids using high-performance liquid chromatography equipped with a strong cation exchange resin pre-column **202** (OA)

Endocrine function testing. A survey of endocrine function testing by clinical biochemistry laboratories in the UK **112** (L)

Enhanced chemiluminescent reaction. Serum and tissue antioxidant capacity in cervical intraepithelial neoplasia investigated using an enhanced chemiluminescent reaction **86** (OA)

Enzyme immunoassay. Development of a highly sensitive enzyme immunoassay for human calcitonin using solid phase coupled with multiple antibodies **629** (OA)

Enzyme-linked immunosorbent assay

Comparison of two methods for measurement of cardiac troponin T in patients with acute myocardial infarction **242** (SR)

Different strategies in the laboratory diagnosis of autoimmune disease: immunofluorescence, enzyme-linked immunosorbent assay or both? **189** (OA)

Effect of low-density lipoprotein antigen source on an enzyme-linked immunosorbent assay for autoantibodies against oxidized LDL **333** (OA)

Levels of 24,25-dihydroxyvitamin D₃, 25-hydroxyvitamin D₃ and 25-hydroxyvitamin D₃ 3-sulphate in human plasma **43** (OA)

Eosinophil cationic protein. Eosinophil cationic protein in serum from nonatopic and asymptomatic atopic individuals after standardized blood clotting at 37 °C **353** (OA)

Epilepsy. New antiepileptic drugs **10** (PV); **785** (L)

Erythropoietin kits. Evaluation of six erythropoietin kits **380** (OA)

Escherichia coli O157 vero toxin genes. Direct amplification of *Escherichia coli* O157 vero toxin genes from human faeces by the polymerase chain reaction **642** (OA)

Essential fatty acids. Essential fatty acids profile and lipid peroxides in severe pre-eclampsia **62** (OA)

Ethanol. Alcoholic ketoacidosis as the cause of repeated episodes of severe metabolic acidosis **783** (CR)

Ethnicity

Assessment of the feasibility of conducting population prevalence studies of chronic renal failure according to ethnic group: a survey of clinical biochemistry laboratories in Greater London and south east England **94** (OA)

- Establishing trimester- and ethnic group-related reference ranges for fructosamine and HbA_{1c} in non-diabetic pregnant women **235** (SR)
- Exocrine pancreatic insufficiency**, Faecal elastase I: a marker of exocrine pancreatic insufficiency in cystic fibrosis **739** (OA)
- External quality assessment**, Problematic performance of thyroid stimulating hormone kit in external quality assessment does not affect its popularity **99** (OA)
- External quality assurance**, External quality assurance – a personal view **112** (L); **113** (L)
- Factitious normocalcaemia**, A case of factitious normocalcaemia **530** (L)
- Ferric reducing/antioxidant power**, Total antioxidant power of plasma: male-female differences and effect of anticoagulant used **104** (SR)
- Fibronectin**, Rapid detection of insulin-like growth factor-binding protein-1 and foetal fibronectin in cervico-vaginal secretions to diagnose premature membrane rupture **388** (SR)
- Flame atomic emission spectrometry**, Survey of serum potassium reference measurements **80** (OA)
- Fluorescing teeth**, Compound heterozygous hereditary coproporphyrin with fluorescing teeth **680** (CR)
- Foetal fibronectin**, Rapid detection of insulin-like growth factor-binding protein-1 and foetal fibronectin in cervico-vaginal secretions to diagnose premature membrane rupture **388** (SR)
- Folate**, Biological variability and reference intervals for total plasma homocysteine **56** (OA)
- FRAP**, Total antioxidant power of plasma: male-female differences and effect of anticoagulant used **104** (SR)
- Free beta-hCG**, Accuracy of Down's syndrome risks produced in a prenatal screening program **101** (SR)
- Fructosamine**, Establishing trimester- and ethnic group-related reference ranges for fructosamine and HbA_{1c} in non-diabetic pregnant women **235** (SR)
- Frusemide test**, Renal tubular acidosis **408** (RA)
- Galactosaemia**, Carbohydrate-deficient glycoprotein syndromes: inborn errors of protein glycosylation **20** (RA)
- Gas chromatography**
Evaluation of detection techniques and laboratory proficiency in testing for drugs of abuse in urine: an external quality assessment scheme using clinically realistic urine samples **592** (OA)
Personal computer-based system for interpretation of gas chromatography mass spectrometry data in the diagnosis of organic acidurias **671** (SR)
- Gastric carcinoma**, An unusual alkaline phosphatase isoenzyme associated with gastric carcinoma **743** (OA)
- Gel filtration**, Detection of lactate dehydrogenase isoenzyme-M in body fluids containing albumin **250** (SR)
- General practice**, Hypophosphataemia in general practice patients **37** (OA)
- Generation atomic absorption and atomic fluorescence spectrometry**, Measurement of selenium in clinical specimens **301** (RA)
- Genetic polymorphisms**, Cytochrome P450 enzyme system: genetic polymorphisms and impact on clinical pharmacology **722** (RA)
- Gestational age**, Correlation of marker values in Down's syndrome screening: the effect of dating error **460** (OA)
- Glomerular filtration rate**, Serum chromogranin A and its relationship to endogenous markers of glomerular filtration rate **247** (SR)
- Glucose**, Precision, accuracy and linearity of radio-meter EML 105 whole blood metabolite biosensors **730** (OA)
- Glucose monitors**, Analytical error of home glucose monitors: a comparison of 18 systems **72** (OA)
- Glucose tolerance**, Influence of the laboratory upon requests for oral glucose tolerance tests for the diagnosis of diabetes mellitus **260** (L)
- Glucose-6 phosphate**, Hyphens **786** (L)
- Glucosuria**, Serum concentration and renal handling of 1,5-anhydro-D-glucitol in patients with chronic renal failure **749** (OA)
- Glutathione peroxidase**, Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin **216** (OA)
- Glycated haemoglobin**
Establishing trimester- and ethnic group-related reference ranges for fructosamine and HbA_{1c} in non-diabetic pregnant women **235** (SR)
Measurement of glycated haemoglobin by boronate-affinity high-pressure liquid chromatography **233** (SR)
- Glycation**, Differences in rates of glycation (glycation index) may significantly affect individual HbA_{1c} results in type 1 diabetes **451** (OA)
- Glycosylation**, Carbohydrate-deficient glycoprotein syndromes: inborn errors of protein glycosylation **20** (RA)
- Glycyl-D-alanine**, Behaviour of urinary dipeptidase in patients with chronic renal failure **221** (OA)
- Graphite furnace atomic absorption spectrometry**, Measurement of selenium in clinical specimens **301** (RA)
- Graves' disease**, Graves' disease presenting with cholestatic jaundice **677** (CR)
- Growth hormone**, Development and evaluation of a direct immunofluorimetric assay for urinary growth hormone **649** (OA)
- Gyrate atrophy**, Hyperornithinaemia associated with gyrate atrophy of the choroid and retina: two cases from India **519** (CR)
- Haemoglobin A_{1c} (HbA_{1c})**
Differences in rates of glycation (glycation index) may significantly affect individual HbA_{1c} results in type 1 diabetes **451** (OA)
Establishing trimester- and ethnic group-related reference ranges for fructosamine and HbA_{1c} in non-diabetic pregnant women **235** (SR)
Measurement of HbA_{1c} by high-performance liquid chromatography in patients with renal failure **238** (SR)

- Haemoglobin variants.** Measurement of glycosylated haemoglobin by boronate-affinity high-pressure liquid chromatography **233** (SR)
- Haptoglobin.** No relationship between serum lipoprotein(a) and albumin concentrations in patients with acute phase response **617** (OA)
- Haptoglobin phenotyping.** A new method for haptoglobin phenotyping **609** (OA)
- Health care.** Paying for health care in the USA **1** (PV)
- Health economics.** The inordinate complexity of delivering laboratory services in the USA **123** (PV)
- Heart failure.** Monitoring of cardiac troponin I in patients with acute heart failure **433** (OA)
- Heavy metal poisoning.** Heavy metal poisoning and its laboratory investigation **267** (RA)
- Hemicolectomy.** Night blindness following hemicolectomy and radiotherapy **395** (CR)
- Hepatic lipase.** Atorvastatin and low-density lipoprotein subfractions profile in mixed hyperlipidaemia: a contributory effect of reduced hepatic lipase activity? **788** (L)
- Hepatitis C virus.** Hepatitis C virus in calibrators and quality assurance samples made from pooled human serum **785** (L)
- Hepatobiliary disorders.** A kinetic model of mitochondrial aspartate aminotransferase transmigration in hepatobiliary disorders **226** (OA)
- Heterophilic antibodies.** Interference in immunoassay **704** (RA)
- High-density lipoprotein**
Blood dolichols in a patient with abetalipoproteinemia **176** (OA)
Metabolism of apolipoproteins AI and AII in a patient with paradoxical reduction in high-density lipoprotein due to ciprofibrate **523** (CR)
- High-performance liquid chromatography**
Levels of 24,25-dihydroxyvitamin D₃, 25-hydroxyvitamin D₃ and 25-hydroxyvitamin D₃ 3-sulphate in human plasma **43** (OA)
Measurement of HbA_{1c} by high-performance liquid chromatography in patients with renal failure **238** (SR)
Measurement of phenylalanine and tyrosine in plasma by high-performance liquid chromatography using the inherent fluorescence of aromatic amino acids **207** (OA)
Measurement of urinary amino acids using high-performance liquid chromatography equipped with a strong cation exchange resin pre-column **202** (OA)
Serum retinol and alpha-tocopherol levels in healthy Asian subjects and patients **244** (SR)
- High-pressure liquid chromatography.** Measurement of glycosylated haemoglobin by boronate-affinity high-pressure liquid chromatography **233** (SR)
- High spinal injury.** Profound hyponatraemia in quadriplegia **673** (CR)
- HIV.** Beta-2-microglobulin and immunoglobulins are more useful markers of disease progression in HIV than neopterin and adenosine deaminase **601** (OA)
- HMGCoA reductase inhibitors.** Effect of atorvastatin on low-density lipoprotein subfraction profile **240** (SR)
- Home glucose monitors.** Analytical error of home glucose monitors: a comparison of 18 systems **72** (OA)
- Homocysteine**
Abbott IMx homocysteine assay: significant interference by 3-deazaadenosine **533** (L)
Biological variability and reference intervals for total plasma homocysteine **56** (OA)
Recommended approaches for the laboratory measurement of homocysteine in the diagnosis and monitoring of patients with hyperhomocysteinemia **372** (OA)
Stabilizing blood with 3-deazaadenosine interferes in the Abbott FPIA assay for plasma homocyst(e)ine **669** (SR)
- Homogentisic acid.** 'Pseudohypouricosuria' in alcaptonuria: homogentisic acid interference in the measurement of urinary uric acid with the uricase-peroxidase reaction **501** (OA)
- Hook effects.** Interference in immunoassay **704** (RA)
- Human chorionic gonadotrophin**
Analysis of hCG: clinical applications and assay requirements **259** (L)
Correlation of marker values in Down's syndrome screening: the effect of dating error **460** (OA)
Evaluation of different weight correction methods for antenatal serum screening using data from two multi-centre programmes **359** (OA)
- Humoral hypercalcaemia.** Raised urinary pyridinium cross-links in humoral hypercalcaemia of malignancy **107** (CR)
- Hydrazide.** Development and evaluation of a direct immunofluorimetric assay for urinary growth hormone **649** (OA)
- Hydride.** Measurement of selenium in clinical specimens **301** (RA)
- Hydrocortisone.** Assessment of corticosteroid replacement therapy in adults with adrenal insufficiency **151** (RA)
- Hydroxybutyrate dehydrogenase.** Influence of mammary artery as a bypass vessel on the results of seven biochemical assays after coronary artery bypass surgery **180** (OA)
- 21-Hydroxylase deficiency.** Bloodspot testosterone assay suitable for study of neonates and monitoring of children with congenital adrenal hyperplasia **477** (OA)
- Hypercalcaemia.** Raised urinary pyridinium cross-links in humoral hypercalcaemia of malignancy **107** (CR)
- Hyperhomocysteinemia.** Recommended approaches for the laboratory measurement of homocysteine in the diagnosis and monitoring of patients with hyperhomocysteinemia **372** (OA)
- Hyperlipidaemia.** Atorvastatin and low-density lipoprotein subfractions profile in mixed hyperlipidaemia: a contributory effect of reduced hepatic lipase activity? **788** (L)
- Hyperornithinaemia.** Hyperornithinaemia associated with gyrate atrophy of the choroid and retina: two cases from India **519** (CR)
- Hyperphosphatasaemia.** Transient hyperphosphatasaemia in an adult with pre-existing liver disease **516** (CR)

- Hypertension**, Increased plasma proadrenomedullin N-terminal 20 peptide in patients with essential hypertension **622** (OA)
- Hyphens**, Hyphens **786** (L)
- Hypoalbuminaemia**, Hypocholesterolaemia in a hospital population **613** (OA)
- Hypocholesterolaemia**, Hypocholesterolaemia in a hospital population **613** (OA)
- Hypoglycaemic coma**, Secondary adrenal failure in a young woman presenting as hypoglycaemic coma **114** (L)
- Hyponatraemia**
 Profound hyponatraemia in quadriplegia **673** (CR)
 Review of investigation and management of severe hyponatraemia in a hospital population **158** (OA); **531** (L)
- Hypophosphataemia**, Hypophosphataemia in general practice patients **37** (OA)
- i-STAT**, The portable laboratory: an evaluation of the accuracy and reproducibility of i-STAT **66** (OA); **531** (L)
- Immunoassay**
 Development of a highly sensitive enzyme immunoassay for human calcitonin using solid phase coupled with multiple antibodies **629** (OA)
 Evaluation of detection techniques and laboratory proficiency in testing for drugs of abuse in urine: an external quality assessment scheme using clinically realistic urine samples **592** (OA)
 Interference in immunoassay **704** (RA)
- Immunoblotting**, Detecting anti-SSA and anti-SSB antibodies in routine analysis: a comparison between double immunodiffusion and immunoblotting **365** (OA)
- Immunofixation**
 Can isoelectric focusing reduce the number of samples requiring immunofixation? **769** (SR)
 Unusually slow-migrating albumin variants: rapid confirmation using immunofixation **514** (SR)
- Immunofluorescence**, Different strategies in the laboratory diagnosis of autoimmune disease: immunofluorescence, enzyme-linked immunosorbent assay or both? **189** (OA)
- Immunoglobulins**, Beta-2-microglobulin and immunoglobulins are more useful markers of disease progression in HIV than neopterin and adenosine deaminase **601** (OA)
- Immunosorbent assay**, Comparison of two methods for measurement of cardiac troponin T in patients with acute myocardial infarction **242** (SR)
- Inductively-coupled plasma mass spectrometry**, Measurement of selenium in clinical specimens **301** (RA)
- Insulin**, Assays for insulin, proinsulin(s) and C-peptide **541** (RA)
- Insulin-like growth factor-binding protein-1**, Rapid detection of insulin-like growth factor-binding protein-1 and foetal fibronectin in cervico-vaginal secretions to diagnose premature membrane rupture **388** (SR)
- Insulin resistance**, Diurnal variations in peripheral insulin resistance and plasma non-esterified fatty acid concentrations: a possible link? **447** (OA)
- Insulin sensitivity**, Diurnal variations in peripheral insulin resistance and plasma non-esterified fatty acid concentrations: a possible link? **447** (OA)
- Intensive care**
 Does blood lactate measurement have a role in the management of the critically ill patient? **401** (PV)
 Hypocholesterolaemia in a hospital population **613** (OA)
- Inter-laboratory variability**, Prevention of protein adsorption: effect on patient results for micro-albuminuria **163** (OA)
- Interference**
 Evaluation of five different high-density lipoprotein cholesterol assays: the most precise are not the most accurate **168** (OA)
 Interference in immunoassay **704** (RA)
- Intestinal-like alkaline phosphatase**, An unusual alkaline phosphatase isoenzyme associated with gastric carcinoma **743** (OA)
- Ion chromatography**, Survey of serum potassium reference measurements **80** (OA)
- Isoelectric focusing**, Can isoelectric focusing reduce the number of samples requiring immunofixation? **769** (SR)
- Japan**, Screening for aetiology of thrombophilia: a high prevalence of protein S abnormality **423** (OA)
- Jaundice**, Graves' disease presenting with cholestatic jaundice **677** (CR)
- Journal Watch** **119, 264, 397, 537, 687, 792**
- Kashin-Beck disease**, Measurement of selenium in clinical specimens **301** (RA)
- Keshan syndrome**, Measurement of selenium in clinical specimens **301** (RA)
- Ketoacidosis**, Alcoholic ketoacidosis as the cause of repeated episodes of severe metabolic acidosis **783** (CR)
- Kininase II**, Variations in serum angiotensin-converting enzyme activity following lung resection: a controlled study in a clinical setting **212** (OA)
- L-tryptophan**, Alleviation of carbon tetrachloride-induced chronic liver injury and related dysfunction by L-tryptophan in rats **504** (OA)
- Laboratory testing**, The inordinate complexity of delivering laboratory services in the USA **123** (PV)
- Lactate**
 Does blood lactate measurement have a role in the management of the critically ill patient? **401** (PV)
 Precision, accuracy and linearity of radiometer EML 105 whole blood metabolite biosensors **730** (OA)
- Lactate dehydrogenase**, Influence of mammary artery as a bypass vessel on the results of seven biochemical assays after coronary artery bypass surgery **180** (OA)
- Lactate dehydrogenase isoenzyme-M**, Detection of lactate dehydrogenase isoenzyme-M in body fluids containing albumin **250** (SR)
- Lead**, Heavy metal poisoning and its laboratory investigation **267** (RA)
- Lia-mat 300**, Measurement of S-100 protein using the automated chemiluminescence system Lia-mat 300 **777** (SR)

- Lipid peroxidation**, Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin **216** (OA)
- Lipid peroxides**, Essential fatty acids profile and lipid peroxides in severe pre-eclampsia **62** (OA)
- Lipoprotein**
 Blood dolichols in a patient with abetalipoproteinemia **176** (OA)
 Evaluation of five different high-density lipoprotein cholesterol assays: the most precise are not the most accurate **168** (OA)
- Lipoprotein(a)**, No relationship between serum lipoprotein(a) and albumin concentrations in patients with acute phase response **617** (OA)
- Liver disease**, Transient hyperphosphatasaemia in an adult with pre-existing liver disease **516** (CR)
- Liver injury**, Alleviation of carbon tetrachloride-induced chronic liver injury and related dysfunction by L-tryptophan in rats **504** (OA)
- Low-density lipoprotein**
 Atorvastatin and low-density lipoprotein subfractions profile in mixed hyperlipidaemia: a contributory effect of reduced hepatic lipase activity? **788** (L)
 Carotenoid composition and antioxidant potential in subfractions of human low-density lipoprotein **323** (OA)
 Effect of atorvastatin on low-density lipoprotein subfraction profile **240** (SR)
 Effect of low-density lipoprotein antigen source on an enzyme-linked immunosorbent assay for autoantibodies against oxidized LDL **333** (OA)
- Lung resection**, Variations in serum angiotensin-converting enzyme activity following lung resection: a controlled study in a clinical setting **212** (OA)
- Lycopene**, Carotenoid composition and antioxidant potential in subfractions of human low-density lipoprotein **323** (OA)
- Lymphocyte**, Lymphocyte populations in tuberculous pleural effusions **492** (OA)
- Lymphoid cells**, Quantitative analysis of ribonucleoside triphosphates in human lymphoid cells by micellar electrokinetic capillary chromatography **636** (OA)
- Male-female differences**, Total antioxidant power of plasma: male-female differences and effect of anticoagulant used **104** (SR)
- Matrix effects**, Interference in immunoassay **704** (RA)
- Medicare/Medicaid**, Paying for health care in the USA **1** (PV)
- Melanoma**, Measurement of S-100 protein using the automated chemiluminescence system Lia-mat 300 **777** (SR)
- Mercury**, Heavy metal poisoning and its laboratory investigation **267** (RA)
- Metabolic acidosis**, Alcoholic ketoacidosis as the cause of repeated episodes of severe metabolic acidosis **783** (CR)
- Methaemoglobin**, Quantitative determination of methaemoglobin and carboxyhaemoglobin by co-oximetry, and effect of anticoagulants **774** (SR)
- Methionine**, Methionine loading in a Down's syndrome patient with cerebral infarction **252** (CR)
- Micellar electrokinetic capillary chromatography**, Quantitative analysis of ribonucleoside triphosphates in human lymphoid cells by micellar electrokinetic capillary chromatography **636** (OA)
- Microalbuminuria**
 Microalbuminuria: yet another cardiovascular risk factor? **700** (PV)
 Prevention of protein adsorption: effect on patient results for microalbuminuria **163** (OA)
- Microtitre**, Development and evaluation of a direct immunofluorimetric assay for urinary growth hormone **649** (OA)
- Mitochondrial aspartate aminotransferase**, A kinetic model of mitochondrial aspartate aminotransferase transmigration in hepatobiliary disorders **226** (OA)
- Molecular fluorescence spectrometry**, Measurement of selenium in clinical specimens **301** (RA)
- Monoclonal proteins**, Can isoelectric focusing reduce the number of samples requiring immunofixation? **769** (SR)
- Mortality**, Review of investigation and management of severe hyponatraemia in a hospital population **158** (OA); **531** (L)
- Mucins**, CA 15-3 and related mucins as circulating markers in breast cancer **579** (RA)
- Myocardial infarction**
 Biological variability and reference intervals for total plasma homocysteine **56** (OA)
 Comparison of two methods for measurement of cardiac troponin T in patients with acute myocardial infarction **242** (SR)
 Multisite study of a second generation whole blood rapid assay for cardiac troponin T **438** (OA)
- N-acetylglucosaminyltransferase II**, Carbohydrate-deficient glycoprotein syndromes: inborn errors of protein glycosylation **20** (RA)
- N-telopeptide**, Clinical usefulness of biochemical resorption markers in osteoporosis **483** (OA)
- α -Naphthylisothiocyanate**, A kinetic model of mitochondrial aspartate aminotransferase transmigration in hepatobiliary disorders **226** (OA)
- Near-patient testing**, The portable laboratory: an evaluation of the accuracy and reproducibility of i-STAT **66** (OA); **531** (L)
- Neopterin**, Beta-2-microglobulin and immunoglobulins are more useful markers of disease progression in HIV than neopterin and adenosine deaminase **601** (OA)
- Nephrogenic diabetes insipidus**, Nephrogenic diabetes insipidus due to a new mutation of the arginine vasopressin V2 receptor gene in a girl presenting with non-accidental injury **779** (CR)
- Neural cell adhesion molecules (NCAMs)**, Expression and secretion of neural cell adhesion molecules by human pituitary adenomas **660** (OA)
- Neural tube defects**, Evaluation of different weight correction methods for antenatal serum screening using data from two multi-centre programmes **359** (OA)
- Neurological deficits**, Threshold concentration of unbound bilirubin to induce neurological deficits in a

- patient with type I Crigler-Najjar syndrome 347 (OA)
- Night blindness.** Night blindness following hemicolec-tomy and radiotherapy 395 (CR)
- Non-accidental injury.** Nephrogenic diabetes insipidus due to a new mutation of the arginine vasopressin V2 receptor gene in a girl presenting with non-accidental injury 779 (CR)
- Non-esterified fatty acids.** Diurnal variations in per-ipheral insulin resistance and plasma non-esterified fatty acid concentrations: a possible link? 447 (OA)
- Non-thyroidal illness syndrome.** Knowing the serum C-reactive protein concentration is not helpful when interpreting thyroid function tests 766 (SR)
- Occupational standards.** The clinical role of clinical biochemists 691 (PV)
- Opiates.** Evaluation of detection techniques and laboratory proficiency in testing for drugs of abuse in urine: an external quality assessment scheme using clinically realistic urine samples 592 (OA)
- Oral glucose tolerance tests.** Influence of the laboratory upon requests for oral glucose tolerance tests for the diagnosis of diabetes mellitus 260 (L)
- Organic acidemias.** A personal computer-based system for interpretation of gas chromatography mass spectrometry data in the diagnosis of organic acidemias 671 (SR)
- Osteoporosis**
Clinical usefulness of biochemical resorption markers in osteoporosis 483 (OA)
Development of a highly sensitive enzyme immunoassay for human calcitonin using solid phase coupled with multiple antibodies 629 (OA)
- Ovarian hyperstimulation syndrome.** Pseudocholin-esterase deficiency: a dangerous, unrecognized complication of the ovarian hyperstimulation syn-drome 256 (CR)
- Oxidative stress.** Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin 216 (OA)
- Oxidized LDL.** Effect of low-density lipoprotein antigen source on an enzyme-linked immunosorbent assay for autoantibodies against oxidized LDL 333 (OA)
- Oxygen saturation.** Quantitative determination of methaemoglobin and carboxyhaemoglobin by co-oximetry, and effect of anticoagulants 774 (SR)
- Oxygen therapy.** Caution is needed in point-of-care monitoring of oxygen therapy in chronic obstructive pulmonary disease 109 (CR)
- p53 gene mutations.** Detection of p53 gene mutations in its full translational sequence by cleavage fragment length polymorphism analysis 511 (SR)
- Pancreas.** Faecal elastase I: a marker of exocrine pancreatic insufficiency in cystic fibrosis 739 (OA)
- Payments.** The inordinate complexity of delivering laboratory services in the USA 123 (PV)
- Peroxidase-sensitive stains.** A new method for hapto-globin phenotyping 609 (OA)
- Phaeochromocytoma.** Increased plasma proadreno-medullin N-terminal 20 peptide in patients with essential hypertension 622 (OA)
- Phenylketonuria.** Measurement of phenylalanine and tyrosine in plasma by high-performance liquid chromatography using the inherent fluorescence of aromatic amino acids 207 (OA)
- Phosphate.** Hypophosphataemia in general practice patients 37 (OA)
- Pituitary adenomas.** Expression and secretion of neural cell adhesion molecules by human pituitary adeno-mas 660 (OA)
- Platinum.** Measurement of platinum in saliva of patients treated with cisplatin 655 (OA)
- Pleuritis.** Lymphocyte populations in tuberculous pleural effusions 492 (OA)
- Pneumectomy.** Variations in serum angiotensin-converting enzyme activity following lung resection: a controlled study in a clinical setting 212 (OA)
- Point-of-care monitoring.** Caution is needed in point-of-care monitoring of oxygen therapy in chronic obstructive pulmonary disease 109 (CR)
- Point-of-care testing.** The portable laboratory: an evaluation of the accuracy and reproducibility of i-STAT 66 (OA); 531 (L)
- Poisoning.** Heavy metal poisoning and its laboratory investigation 267 (RA)
- Polymerase chain reaction.** Direct amplification of *Escherichia coli* O157 vero toxin genes from human faeces by the polymerase chain reaction 642 (OA)
- Pooled human serum.** Hepatitis C virus in calibrators and quality assurance samples made from pooled human serum. 785 (L)
- Population prevalence.** Assessment of the feasibility of conducting population prevalence studies of chronic renal failure according to ethnic group: a survey of clinical biochemistry laboratories in Greater London and south east England 94 (OA)
- Portable laboratory.** The portable laboratory: an evaluation of the accuracy and reproducibility of i-STAT 66 (OA); 531 (L)
- Post-transcriptional glycation.** Differences in rates of glycation (glycation index) may significantly affect individual HbA_{1c} results in type I diabetes 451 (OA)
- Potassium.** Survey of serum potassium reference measurements 80 (OA)
- Pre-eclampsia.** Essential fatty acids profile and lipid peroxides in severe pre-eclampsia 62 (OA)
- Pregnancy**
Are cotinine assays of value in predicting adverse pregnancy outcome? 468 (OA), 789 (L)
Association of the 'secretor state' with the presence and recurrence of urinary infections in pregnant women 391 (SR)
- Premature membrane rupture.** Rapid detection of insulin-like growth factor-binding protein-I and foetal fibronectin in cervico-vaginal secretions to diagnose premature membrane rupture 388 (SR)
- Prenatal screening program.** Accuracy of Down's syndrome risks produced in a prenatal screening program 101 (SR)
- Preterm infants.** Bloodspot testosterone assay suitable for study of neonates and monitoring of children with congenital adrenal hyperplasia 477 (OA)

- Proadrenomedullin N-terminal 20 peptide**, Increased plasma proadrenomedullin N-terminal 20 peptide in patients with essential hypertension **622** (OA)
- Proinsulin(s)**, Assays for insulin, proinsulin(s) and C-peptide **541** (RA)
- Prostate-specific antigen**, Influence of investigative and operative procedures on serum prostate-specific antigen concentration **340** (OA)
- Proteases**, Faecal elastase 1: a marker of exocrine pancreatic insufficiency in cystic fibrosis **739** (OA)
- Protein adsorption**, Prevention of protein adsorption: effect on patient results for microalbuminuria **163** (OA)
- Protein glycosylation**, Carbohydrate-deficient glycoprotein syndromes: inborn errors of protein glycosylation **20** (RA)
- Protein S**, Screening for aetiology of thrombophilia: a high prevalence of protein S abnormality **423** (OA)
- Pseudocholinesterase deficiency**, Pseudocholinesterase deficiency: a dangerous, unrecognized complication of the ovarian hyperstimulation syndrome **256** (CR)
- Pseudohypouricosuria**, 'Pseudohypouricosuria' in alcaptonuria: homogenetic acid interference in the measurement of urinary uric acid with the uricase-peroxidase reaction **501** (OA)
- Pyelonephritis**, Influence of acetate and bicarbonate dialysate on blood short- and long-chain acyl carnitine in adult pyelonephritis patients **48** (OA), **786** (L)
- Pyridinium**, Raised urinary pyridinium cross-links in humoral hypercalcaemia of malignancy **107** (CR)
- Pyridinoline cross-links**, Age-related changes in the concentration of pyridinoline cross-links in human skin **666** (SR)
- Pyridoxine**, Hyperornithinaemia associated with gyrate atrophy of the choroid and retina: two cases from India **519** (CR)
- Quadriplegia**, Profound hyponatraemia in quadriplegia **673** (CR)
- Quality assurance samples**, Hepatitis C virus in calibrators and quality assurance samples made from pooled human serum **785** (L)
- Quality of comments**, Assessing the quality of comments on reports: a retrospective study **316** (OA)
- Radiation enteritis**, Night blindness following hemicolectomy and radiotherapy **395** (CR)
- Radiometer EML 105 system**, Precision, accuracy and linearity of radiometer EML 105 whole blood metabolite biosensors **730** (OA)
- Radiotherapy**, Night blindness following hemicolectomy and radiotherapy **395** (CR)
- Reference measurements**, Survey of serum potassium reference measurements **80** (OA)
- Reimbursement**, The inordinate complexity of delivering laboratory services in the USA **123** (PV)
- Renal disease**, Is the Bayer DCA 2000 acceptable as a screening instrument for the early detection of renal disease? **393** (SR)
- Renal failure**
Measurement of HbA_{1c} by high-performance liquid chromatography in patients with renal failure **238** (SR)
- Serum chromogranin A and its relationship to endogenous markers of glomerular filtration rate **247** (SR)
- Renal function**, Urinary catecholamine excretion in relation to renal function **587** (OA)
- Renal function tests**, Assessment of the feasibility of conducting population prevalence studies of chronic renal failure according to ethnic group: a survey of clinical biochemistry laboratories in Greater London and south east England **94** (OA)
- Renal handling**, Serum concentration and renal handling of 1,5-anhydro-D-glucitol in patients with chronic renal failure **749** (OA)
- Renal tubular acidosis**, Renal tubular acidosis **408** (RA)
- Reports**, Assessing the quality of comments on reports: a retrospective study **316** (OA)
- Retinol**, Serum retinol and alpha-tocopherol levels in healthy Asian subjects and patients **244** (SR)
- Rheumatological disorders**, Autoantibodies and specific serum proteins in the diagnosis of rheumatological disorders **565** (RA)
- Ribonucleoside triphosphates**, Quantitative analysis of ribonucleoside triphosphates in human lymphoid cells by micellar electrokinetic capillary chromatography **636** (OA)
- Risk factor**, Microalbuminuria: yet another cardiovascular risk factor? **700** (PV)
- S-100 protein**, Measurement of S-100 protein using the automated chemiluminescence system Lia-mat 300 **777** (SR)
- Saliva**, Measurement of platinum in saliva of patients treated with cisplatin **655** (RA)
- Secondary adrenal failure**, Secondary adrenal failure in a young woman presenting as hypoglycaemic coma **114** (L)
- 'Secretor state'**, Association of the 'secretor state' with the presence and recurrence of urinary infections in pregnant women **391** (SR)
- Selenium**, Measurement of selenium in clinical specimens **301** (RA)
- Semimicro method**, A simple, rapid and sensitive semimicro method for the measurement of cyanide in blood **755** (OA)
- Sepsis**, Hypocholesterolaemia in a hospital population **613** (OA)
- Serum concentration**, Serum concentration and renal handling of 1,5-anhydro-D-glucitol in patients with chronic renal failure **749** (OA)
- Serum proteins**, Autoantibodies and specific serum proteins in the diagnosis of rheumatological disorders **565** (RA)
- Severity of illness**, Knowing the serum C-reactive protein concentration is not helpful when interpreting thyroid function tests **766** (SR)
- SIADH**, Review of investigation and management of severe hyponatraemia in a hospital population **158** (OA); **531** (L)
- Sjögren's syndrome**, Detecting anti-SSA and anti-SSB antibodies in routine analysis: a comparison between double immunodiffusion and immunoblotting **365** (OA)
- Skin**, Age-related changes in the concentration of pyridinoline cross-links in human skin **666** (SR)

- Small-for-gestational-age.** Are cotinine assays of value in predicting adverse pregnancy outcome? **468** (OA), **789** (L)
- Smoke inhalation.** A simple, rapid and sensitive semimicro method for the measurement of cyanide in blood **755** (OA)
- Smoking.** Are cotinine assays of value in predicting adverse pregnancy outcome? **468** (OA), **789** (L)
- Sodium**
 Profound hyponatraemia in quadriplegia **673** (CR)
 Review of investigation and management of severe hyponatraemia in a hospital population **158** (OA); **531** (L)
- Sodium nitroprusside.** A simple, rapid and sensitive semimicro method for the measurement of cyanide in blood **755** (OA)
- Specificity.** Interference in immunoassay **704** (RA)
- Standardization.** Prevention of protein adsorption: effect on patient results for microalbuminuria **163** (OA)
- Super bone scan.** An unusual alkaline phosphatase isoenzyme associated with gastric carcinoma **743** (OA)
- Superoxide dismutase.** Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin **216** (OA)
- Synacthen test protocols.** A survey of endocrine function testing by clinical biochemistry laboratories in the UK **112** (L)
- Systemic lupus erythematosus**
 Detecting anti-SSA and anti-SSB antibodies in routine analysis: a comparison between double immunodiffusion and immunoblotting **365** (OA)
 Effect of low-density lipoprotein antigen source on an enzyme-linked immunosorbent assay for autoantibodies against oxidized LDL **333** (OA)
- T-lymphocytes.** Three-colour, one-tube flow cytometric method for enumeration of CD4+ and CD8+ lymphocytes **196** (OA)
- Taq DNA polymerase.** Direct amplification of *Escherichia coli* O157 vero toxin genes from human faeces by the polymerase chain reaction **642** (OA)
- Teeth.** Compound heterozygous hereditary coproporphyrin with fluorescing teeth **680** (CR)
- Testosterone.** Bloodspot testosterone assay suitable for study of neonates and monitoring of children with congenital adrenal hyperplasia **477** (OA)
- Thallium.** Heavy metal poisoning and its laboratory investigation **267** (RA)
- Therapeutic drug monitoring**
 Measurement of platinum in saliva of patients treated with cisplatin **655** (OA)
 New antiepileptic drugs **10** (PV)
- Thoracotomy.** Variations in serum angiotensin-converting enzyme activity following lung resection: a controlled study in a clinical setting **212** (OA)
- Thrombophilia.** Screening for aetiology of thrombophilia: a high prevalence of protein S abnormality **423** (OA)
- Thymidine kinase.** Increased serum thymidine kinase following chemotherapy **771** (SR)
- Thyroid function tests.** Knowing the serum C-reactive protein concentration is not helpful when interpreting thyroid function tests **766** (SR)
- Thyroid stimulating hormone kit.** Problematic performance of thyroid stimulating hormone kit in external quality assessment does not affect its popularity **99** (OA)
- Time-resolved fluorimetry.** Development and evaluation of a direct immunofluorimetric assay for urinary growth hormone **649** (OA)
- Tin.** Heavy metal poisoning and its laboratory investigation **267** (RA)
- Tissue perfusion.** Does blood lactate measurement have a role in the management of the critically ill patient? **401** (PV)
- Transient hyperphosphataemia.** Transient hyperphosphataemia in an adult with pre-existing liver disease **516** (CR)
- Transrectal ultrasound.** Influence of investigative and operative procedures on serum prostate-specific antigen concentration **340** (SR)
- Trisomy 21.** Accuracy of Down's syndrome risks produced in a prenatal screening program **101** (SR)
- Trolox equivalents.** Serum and tissue antioxidant capacity in cervical intraepithelial neoplasia investigated using an enhanced chemiluminescent reaction **86** (OA)
- Troponin** *see* Cardiac troponin
- Tuberculous pleural effusions.** Lymphocyte populations in tuberculous pleural effusions **492** (OA)
- Tumour lysis syndrome.** Increased serum thymidine kinase following chemotherapy **771** (SR)
- Tumour markers.** Creatine kinase-BB isoenzyme in chest pain: an indicator that change in creatine kinase is not always due to an infarct? **526** (CR)
- Tyrosine.** Measurement of phenylalanine and tyrosine in plasma by high-performance liquid chromatography using the inherent fluorescence of aromatic amino acids **207** (OA)
- UK.** A survey of endocrine function testing by clinical biochemistry laboratories in the UK **112** (L)
- Uraemia**
 Measurement of glycated haemoglobin by boronate-affinity high-pressure liquid chromatography **233** (SR)
 Measurement of HbA_{1c} by high-performance liquid chromatography in patients with renal failure **238** (SR)
- Uricase-peroxidase reaction.** 'Pseudohypouricosuria' in alcaptonuria: homogenitetic acid interference in the measurement of urinary uric acid with the uricase-peroxidase reaction **501** (OA)
- Urinary infections.** Association of the 'secretor state' with the presence and recurrence of urinary infections in pregnant women **391** (SR)
- USA**
 Inordinate complexity of delivering laboratory services in the USA **123** (PV)
 Paying for health care in the USA **1** (PV)
- Variability.** Prevention of protein adsorption: effect on patient results for microalbuminuria **163** (OA)

- Vascular disease**, Biological variability and reference intervals for total plasma homocysteine **56** (OA)
- Vitamin A deficiency**, Night blindness following hemicolectomy and radiotherapy **395** (CR)
- Vitamin D₃ metabolites**, Levels of 24,25-dihydroxy-vitamin D₃, 25-hydroxyvitamin D₃ and 25-hydroxyvitamin D₃ 3-sulphate in human plasma **43** (OA)
- Vitamin E**, Effect of oral supplementation with vitamin E on the oxido-reductive status of red blood cells in normal mice and mice subject to oxidative stress by chronic administration of Adriamycin **216** (OA)
- Vitamins E and K deficiencies**, Night blindness following hemicolectomy and radiotherapy **395** (CR)
- Weight correction methods**, Evaluation of different weight correction methods for antenatal serum screening using data from two multi-centre programmes **359** (OA)
- Whole blood analysers**, Precision, accuracy and linearity of radiometer EML 105 whole blood metabolite biosensors **730** (OA)
- Whole blood rapid assay**, Multisite study of a second generation whole blood rapid assay for cardiac troponin T **438** (OA)
